Stockers Sell For 11c, Grass Fat 13c For A Safe Margin

Local Cattle Affects Cattle Market Temporarily This Week

There is no official report on the large sale at the Belle Glade Market for no official report was present in the absence of Speer, but feeders did sell for 11c and fair to good grass fed steers did sell for 13c, according to reliable reports.

Following the lead of cattlemen who have been thru a drought, and those who held on when the prices started to drop only to finally have to take utility prices for good and choice cattle, ranchers of South Florida have begun to unload to their own detriment by depressing the market a couple dollars per CWT under the Chicago Market.

Still, the differential between the sale price of grass fat steers and feeder steers is enough to enable a rancher to make money at present day prices.

One cattlemen suggested that bankers are adding to the confusion by demanding sales from the rancher, although no definite cases of that have been reported so far. Another suggested that the alphabetical financial organizations of the government should step in and take over the commercial loans, for that is one of the main reasons for their original establishment.

One such organization is the Production Credit of Miami in this area.

Another suggests that the (Continued on Page Four)

Growers Shippers League To Banquet In Orlando Wed.

Mr. R. D. Keene, President of the Growers and Shippers League of Florida is asking all members to bring friends to the meeting to be held in Orlando, and especially to the banquet which will be held on Wednesday night, June 24th at 8:00 pm at the Orange Court Hotel.

This is a non-profit organization which works for such things as lower freight rates, and other problems affecting the Florida farmer.

The big occasion is the 30th anniversary of the birth of the organization.

On one occasion, this past year Walter Schlecter on his six mile farm noticed a column of smoke on what appeared to be the back end of his farm. As he was busy supervising a harvest crew it was highly impractical for him to leave. So, Walter just buzzes "Pioneer Growers" central station with the request that Red lines be sent by plane where the area to determine just where the fire was. Red was called.

Major action will be given to the largest cash sale of the year will be presented by Zaharias and White Wheeler personally.

Lots will come out and help our Golf Club with the Cancer Fund.

FULL ITINERARY FOR DISTRICT OFFICERS

Mrs. W. C. Allen, 9th District President of the Legion Auxiliary has appointed the following as her District officers: Mrs. Earl York, secretary; Mrs. Roland Plank, chaplain; Mrs. Robert Riley, historian; Mrs. J. B. Jones, sergeant-at-arms. All of these appointed officers are members of local unit No. 20 with the exception of Mrs. Plank, who is a member of South Bay Unit No. 161 and lives in Lake Harbor.

For the current month, Mrs. Allen and her officers will be faced with a busy schedule covering 18 installations in the 9th district within 30 days.

Tuesday evening, June 9, this group conducted their first installation of the year at Dana at the Marshall La Bree Unit No. 304. Guest speakers at this ceremony were Mrs. Jenn Ryan, Past National Committee woman and Frank Ghiochi, present Area Commander.

Ceremonies took place at the Boca Raton Unit No. 277 and Auxiliary Unit No. 45.

Following the night services were held at the American Legion Home in Boynton Beach by the Clime-Paulsen Legion Post and Auxiliary Unit No. 65.

This installation was attended by 14 representatives of Belle Glade Post and Auxiliary Unit No. 164.

After this meeting's adjournment the members and the guests were entertained with a dinner followed by a dance. Installations were held this week at Davis Unit No. 223 and at Deerfield, Lefley-Hinson Unit No. 162.

This area is bounded by Cleveland, Okeechobee, Hollywood and Jupiter and each unit within this area will be visited by Mrs. Allen and her officers to conduct the installation ceremonies.

To date this group has traveled more than 550 miles and will have traveled many more by the time all installations are completed.

Another suggests that the (Continued on Page Four)

Two-Way Mobile Radio Facilitates Glades Large Farming Operations

With some sixty-two two-way radios used by farmers in the Glades and more planning for the coming season, the statement of Pop Lord about the Growers and Shippers League (now known as Hillsboro Plantation) being a proving ground for agricultural innovation in the Glades is further brought to mind.

Harrison Rasoul as manager of the Hillsboro Great Adventure into agriculture used radios in his field foreman's jeep and pickups two years ago.

Glades farmers enjoy the greatest users of mechanical contraptions of their kind in the visiting and growing, immediately grasped the idea.

Local Lions Club Reaffirms Favor For Hoover Dike

At its regular meeting Wednesday the local Lions Club reaffirmed its previous endorsement of the proposal to name the dike around Lake Okeechobee for the only living ex-republican President.

At the session of the Legislature two years ago practically all organizations around the Lake from Okeechobee to Moore Haven endorsed the idea to name the dike for Hoover, but some were in the Legislature struck Hoover's name and substituted another.

Apparent, righteous indignation fanned and fumed at the session just passed especially among political aspirants about lending aid and comfort to the republicans, and all of them were in the Legislature struck Hoover's name and substituted another.

We have no sympathy with the republicans national programs on the things we are doing here, but we see no particular advantage to the party in Florida by naming the dike after Hoover.

Mr. Hoover has expressed himself as highly sympathetic with the honor and before expressed his desire to attend a ceremony of dedication.

Republican sources report that if Mr. Hoover did come to Florida for such an event, the President may very well be persuaded to come.

With the President and Mr. Hoover, all important persons in Washington will come on invitation among the members of the Legislature and Senators who have to do with our flood control. No legislation will be taken up in a plane with an explanation and a view of the overall plan which is completed.

As the school has only one welding machine and it is necessary to have a machine for each two students, the use of several machines was secured from local owners for use at the two night-per-week.

Thirteen students were graduated from the course which is on the high school and college level, although several more are in the course.

Only cost to the pupils is the cost of the materials which this session amounted to approximately \$5 each.

Plans are being made for other courses in the vocational training program of the State Board in conjunction with the local school board.

Among the students were men who now are practicing the profession as well as neophytes who think they want to practice it.

The story of the work was given to the Lions Club meeting by its regular meeting by Mr. Rider.

Local Legion Post Endorses District Meet Resolutions

Ten representatives of Everglades Post No. 20, Legion and Auxiliary, attended the District Convention held at Orlando May 19, 20, and 21.

Detailed reports of resolutions passed at the Convention were given at the regular meeting June 2, by delegates J. B. Jones, Lawrence Will and Jack Rashley. According to Jones these following resolutions were passed:

1. That the law, passed in June of '53, governing the G. L. Loans be extended at the expiration date.

2. Endorse further loans to U. I. farmers for farm improvements. These 2 resolutions seemingly would be of special interest to the G.L.'s in this, an agricultural area.

3. That Poppy Day be June 3, this year, and that the G. L. Loans be extended at the expiration date.

4. That chiropodists be accepted for the handling of some of the veteran out-patients.

5. That Orlando, Florida, shall be the permanent home of the American Legion, Department of Florida.

Delegate Will placed special emphasis on the program of Americanism, and the potential danger of relinquishing the power of the U. S. Government to the United Nations to either make treaties or to declare war.

FATHER'S DAY

Such a move is now being made in Washington and the Legion and other Veterans' Organizations are trying to make the public aware of the danger in such an agreement.

Those from Belle Glade attending the convention were Mr. and Mrs. Morris Coleman, Mr. and Mrs. J. B. Jones, Mrs. W. C. Allen, and the Messrs. Lawrence E. Will, Jack Rashley, Woody Pierce, Elmer Kirchman, and Ward Harrison.

At the regular meeting of the Everglades Post No. 20, the Commander Jack Rashley appointed the following committee on the Dr. W. J. Buck memorial project: Luther Jones chairman, Joe Friedhelm, Lawrence E. Will, Frank Morris and N. B. Willis.

This project is to obtain a suitable memorial to the late Dr. Buck well known and equally well loved humanitarian, charter member and the first commander of Everglades Post No. 20.

Thru the channels of his professional organization Mr. Bamford has sought and found hearty endorsement and assistance in getting this bill thru Congress.

Congressman Rogers has invited Mr. Bamford to appear before the Committee when hearings are held on the bill.

Lt. and Mrs. Jimmy Williams and children were Sunday visitors at the home of her parents, Mr. and Mrs. George Rawls, where they were on their way to Gordon, Nebraska, where they will stay a month with Lt. Williams' mother and father, Mr. and Mrs. Carl Williams. On his return, Williams, who has been stationed at the Opelousa Naval Air Station for several years, will be transferred to Pensacola for six weeks, after which he will be based at Norfolk for three years. His family will accompany him.

A. Z. Donald Jones, son of Mr. Z. Ingram, is now serving with the Air Force at Southampton, England. He has been in the service 18 months and was stationed in Texas and Orlando before he was shipped to England in March.

CINEMATIC CHAPTER

Hello everybody! Akim Tamiroff, back in the movies after an absence of several years, is happy to report his present project is still making a fortune for him. His first great success, for which he won an Academy Award nomination, was as the Chinese general in "The General Died at Dawn." He won a second Oscar nomination with his portrayal of a Spaniard in "For Whom the Bell Tolls." Cecil B. DeMille called Tamiroff "the finest workman as an actor that I have ever encountered in 35 years association with the theatre." After he had directed him as a Frenchman in "The Buccaneer," the ironic story of an accent that seems to fit any nationality (except English), it was when Tamiroff decided to spend his earnings on English lessons in Chicago in 1929, his pal Gregory Ratoff, talked him out of it. "That is a memory of Ratoff that I must treat with mixed emotions," says Tamiroff. "I must thank him for saving me the accent that has done me so much money. And I must growl at him at the same time, because instead of using my savings for tuition lessons, I invested it in the stock market and lost every cent." While other actors may judge a film role by the number of pages of dialogue they have, the number of scenes in which they appear with the stars, the amount they have to do with motivating the plot, Tamiroff employs none of these. He merely weighs the part. "I do different characters, organizations at different weights," he explains. "I can play comedy best in 180 to 185. Heavy drama, including death scenes,

figure nearer 175. At around 170 I do a beautiful death. See you at the movies... Mal.

ENGINEERS OBSERVE CORPS ANNIVERSARY

Six employees of the Area Engineering Office were honored here today during a ceremony commemorating the 178th anniversary of the Corps of Engineers. The honorees were: Mr. George Cuslow, Area Engineer, in recognition of their long and faithful service to the Corps.

These receiving the awards were: Mr. Clarence E. Bailey, and Mr. Keith W. Gordon, 26 years; and Mr. Alonzo T. Fountain, Mr. Minnie M. McCall, Mr. John F. McClinton, Jr., and Mr. Heenan C. Platt, 10 years.

Mr. Thomas W. Ritter, member of a survey party now working in the Cleveland area, and Mr. Claude R. Schaker, employed at the Tampa Harbor Dredge Depot Reservation, were also awarded 20-year pins during the anniversary ceremonies.

The history of the Corps of Engineers goes back to June 16, 1775, the day before the Battle of Bunker Hill. On that day, General Washington, authorized by the Continental Congress, at the instance of General Washington, authorized the Corps of Engineers, and the Corps of Engineers, authorized the Corps of Engineers.

The Jacksonville District Office, which has charge of all the Florida projects, both civil and military, is headed by Colonel Herman W. Schull, Jr., District Engineer.

Heard About the Electric Weather Predictor?

Squire Smith built up quite a reputation last month by predicting the weather. What he said usually came true.

It got to this fellow world around his little Antipope Shop last Monday, though, he said he didn't know what the weather was going to be like next day. That surprised us and when we asked what happened, Squire said, "I slipped up on an electric ball and now I'm out of it."

So, my radio again tomorrow night. Squire had been getting

Team designated second is HOME TEAM. First game starts at 6:45—second game starts at 8:15—or sooner if first game is completed. If first game is not completed by 8:15, score reverts to last complete inning of play. Games will be 7 innings of play. Dates for rained out or postponed games will be set by teams involved and approved by league president.

FAMOUS RACING CARS OLDTIME AND CURRENT SEEN AT AUTOTAMA

The largest sports car display yet to be held in Palm Beach County will be exhibited on Sunday, June 21, at the James Melton Autotama on Route 1. A display of 15 cars, ranging from 1900 to 1950, will be on hand. The display is the first of its kind in the county. The cars are from the collection of the Melton family. The cars are from the collection of the Melton family. The cars are from the collection of the Melton family.

balls, two errors and a fielders choice to take that early lead. The Legion picked up one run in the second inning on a double by Perkins, a base on balls and a passed ball. They scored again in the fifth on an error and a line single by Pearce, who came in to play third base for the Legion.

The Lions scored their last run in the fourth as lead-off hitter Livingston hit a smashing triple to deep center field and was sent scrambling home on a single by Lockmiller, the Lions second baseman.

Forse started on the mound for the Legion but gave way to Hudspeh in the fourth. Forse pitched one hit ball for the three innings he worked. Van Landingham was behind the plate for the Legion.

Freddie Forse, the Lions center fielder, stopped a sixth inning rally by pulling Perkins long fly ball down in center field for the second out of the sixth inning.

Bush went the route for the Lions with Puckett doing the pitching.

Extra Span of Years and Longer Life Mean Gracious Living—If Planned!

If you are a mature adult now, you have an extra span of years coming to you! At the present time, there are more than 18,000,000 persons aged 65 in the United States, and these more mature years can be made delightful decades of well-being, peace, and comfort. The increase in life expectancy makes it possible for us to trust that the life for which the first was made can be equaled in terms of decades—extra decades worth planning and thought.

Home decorating experts point out that two factors deserve special consideration by the mature:—

1. You probably will condense your belongings and move to a smaller home or apartment making "easy-care" possible—a home that will give a maximum of furnishings with a minimum of demands.

2. You will be smart to select a few good pieces of "dual-purpose" furniture, such as the Hilda-A-Bed by Simmons or the Sofa-Lounge Bed, as central pieces in your new smaller home arrangement. These pieces are done to care for and comfort—and the latter must be emphasized, for it contributes to happiness and a sense of well-being.

People frequently spend much time in their homes, and they want pleasant results.

There are many possibilities such as easy-to-wash curtains and draperies, built-in bookcases, dual-purpose tables. Age is the time for good grooming. The Hilda-A-Bed is a fine example. It will be more worth-while than a formal dining room, for instance, that probably would be used only a few times a year. Fabrics and colors, and can well be the center of a living room, guest room and den.

STATE RENEWS 4-H PROGRAM OF SPECIAL INTEREST TO GIRLS

The National 4-H Dress Review, which has been held annually since approved for 1953 by the State Extension Service, is open to all girls, which is in the 4-H Clothing program, members learn to dress appropriately in keeping with a well-planned family budget, and to develop good posture and habits of good grooming. The popularity of this program is reflected in the enrollment of girls last year, which totaled 69,259. Simplicity Pattern Co. provides awards of home made to county blue award winners and an all-expense trip to the National 4-H Club Congress in Chicago next November to the state winner. Each state winner participating in the national Congress will receive a leather sewing scissor set.

The Extension Agency will furnish complete information concerning these programs.

PEA-SHELLING IN THE OLD FASHIONED WAY BY LEGION AUXILIARY

The blackberry peas, donated by Louis Kirchberger for the School of Instruction to be held on July 17, were shelled at an informal "old-fashioned pea-shelling," held Wednesday night at the Legion Hall.

There were 17 members of the Unit and Post present. Here's what happened, told in rhyme—cause there's nothing better to do with my time. We gathered at the Legion Hall at a quarter 'til seven And shelled blackberry peas 'til way passed eleven.

By special request as a special treat For those who gather for instruction Meets The Champion Sheller, of the whole darned lot Was the Constable's wife, Virginia Prescott.

All and of us profoundly, loudly proclaimed J. B. Jones for "Gold-bricking" fame.

These peas are to be cooked with a pig and nice fat. Here's Listen, Comrades, we're eager on that subject. By A.K.C. pressing, washing and scalding the lot.

You can catch that hog to put in the pot. Well, you've got your peas—We had our fun And finished the job that we begun.

The Cherokee bean plants is a Florida variety of the Indian coral tree.

Let us Help you plan your DREAM HOME

FOR SALE About 75 Parakeets Phone 2374

SHORT WAVE RADIOS

(Continued from Page 1)
present day facilities for communication with those of other cities and states. The State Highway Patrol has from three to five cars in the Glades with connecting stations throughout the state; the sheriff's office has two Glades units on duty; the Everglades Fire Control has some twenty old units, scattered from Ft. Pierce to Clewiston and around the Lake to Moore Haven. The Florida Power and Light Glades group has 7 trucks equipped with two-way radio.

To cap this group, the U. S. Engineers has a system with stations at each of five hurricane gates, with a central system to Clewiston, South Bay; Grace Williams, Belle Glade. The body with a Naval escort and his wife will arrive here Sunday. Services will be held at the First Baptist Church, Tuesday afternoon at 2 o'clock, with U. S. Marshal Paul S. Safford officiating. Burial will be in Woodlawn cemetery, West Palm Beach.

CHARLES DENTON

(Continued from Page One)
father, C. F. Denton, South Bay; two sisters, Mrs. Beatrice Burns West Palm Beach and Mrs. Grace Williams, Belle Glade. The body with a Naval escort and his wife will arrive here Sunday. Services will be held at the First Baptist Church, Tuesday afternoon at 2 o'clock, with U. S. Marshal Paul S. Safford officiating. Burial will be in Woodlawn cemetery, West Palm Beach.

'STOCKERS'

(Continued from Page One)
price of cattle locally is out of line—below the Chicago market—and that a combination of local cattle men to set a price and not sell below that would bring the general buying agencies in these days.

In these days of 80-odd cents for government grade and 13¢ fat cattle, the Republicans must be squirming.

The great danger, we are afraid, is that the public will become so disgusted that they will elect a democratic Congress and it will share the blame of these troublesome times that we have become accustomed to associate with another party.

The mucklarks as the great potential beef producing area in southern Florida is established, and these gyrations of the money market by the smart boys will only strengthen that position.

Donna Marie SAYS...

MODERN HOMEMAKERS USE MODERN HOUSE CLEANING METHODS

Home cleaning methods of today are a far cry from those used by our grandmothers. Science and invention have greatly improved the way of house cleaning that was grandma's lot. The automatic washer, the automatic dryer, the automatic ironer, the vacuum cleaner, applicators, polishers, modern mops, detergents, insecticides, floor polishes, glass cleaners, plus commercial services such as rug cleaning, curtain laundering, window and drapery cleaning. These services, plus the modern housewife's own efforts, are accepted as commonplace in this modern age.

For example, the smart homemaker of 1953 no longer finds it necessary to advise the fact to her visitors that her home is infested with bugs by the use of talcum powder and strong-smelling, obnoxious liquid insecticides. The modern homemaker bug clean as the house cleans with a non-staining, non-drying, non-toxic insecticide such as Real-Kill the King which not only eliminates her bug problems but also prevents future infestations and damages caused by mildew and mold growth.

No doubt the homemaker of 1953 would find house cleaning in 1953 a joyous adventure. Science and invention have simplified house cleaning, adding years of pleasure to the life of the smart homemaker who adopts modern methods.

Home-Frozen Flavor

Much of today's commercial food research has a direct application in the home—for instance, the recent study of the effect of Ac-Cent (pure monosodium glutamate) in quick freezing. Varieties of four basic food—meat, fish, poultry, vegetables—were found to be dramatically improved in flavor when Ac-Cent was included in the pack; and to retain their natural flavor, color and texture through longer periods of frozen storage. The fact that this seasoning helps to "freeze fresh foods young" is as pertinent to homemakers as it is to the frozen food processor.

The third shock—nature's own flavor intensifier—can help you get the most out of your home freezer, by adding "flavor protection" to the convenience of this modern-day method of food preservation. Just try cooking a complete meal with Ac-Cent, for freezing. When you decide to serve it—even several months from now—all the extra-fresh flavors you had to start with, will still be delightfully apparent to your taste. Here's a sample menu for you to fill with home-frozen flavor:

Freezer Chicken Dinner
Select a broiler or fryer weighing not more than 3 pounds, dressed weight; have cut in serving pieces at market. Wash thoroughly. Shake off excess water, but do not dry. Roll pieces in a mixture of 1 cup non-fat milk, 1 teaspoon salt, 1/2 teaspoon pepper and 1/2 teaspoon Ac-Cent until well coated. In a heavy skillet melt fat to a depth of 1/2 inch. When moderately hot, lower pieces of chicken into it. Turn chicken to brown on all sides. Cover; lower heat and cook 1/2 to 1 hour, or until done and tender. Or, transfer broiled chicken to rack in roasting pan; cover and cook in moderate oven 1 hour.

Cook corn and Brussels sprouts as usual. Add 1/2 teaspoon Ac-Cent to the cooking water, along with other seasonings.

Place individual portions of corn, sprouts and chicken in three-compartment aluminum plate, pour in freezer-weight water, or wrap plate in foil and place vegetables in metal covered aluminum foil containers. Freeze all at 0°F. Food may be reheated in moderate oven (350°F.) right in containers.

Florida, for the Lake Okechobee. N. C. — this yard has 61,000 trees region and 1,000 square yards of slope area which would be given a push not likely ever to be overcome.

What's again, and why?

MOST FLORIDA COUNTIES PAY BELOW-AVERAGE SALARIES!

In 1951-52 only 9 of Florida's 67 counties paid average salaries as much as the state average of \$3,222.40—and this was \$142 below the national average! The county paying the highest average salary was \$1,395 above the county paying the lowest. Only Broward, Dade, Duval, Hillsborough, Monroe, Orange, Palm Beach, Pinellas, and Volusia counties pay average teachers' salaries above the state average.

When the term "average salary" is applied to Florida teachers it should be kept in mind that most of Florida's counties (58 in 1951-52) are below the average!

*Includes principals and classroom teachers only.

SHADED COUNTIES
PAY AVERAGE
SALARIES BELOW
STATE AVERAGE

Unless more of Florida's counties are able to pay higher teacher salaries to meet the competition of other states and of private industry, Florida can not expect to attract and hold a sufficient number of qualified teachers to man its classrooms!

CHRYSLER CROWN AND IMPERIALS OFFER WIDE VARIETY IN TRANSMISSION

With the introduction of a new fully-automatic transmission on Chrysler Crown and Custom Imperial models, Chrysler now offers three outstanding automatic transmissions, reports E. C. Quinn, president of Chrysler Division, Chrysler Corporation.

"Our new transmission is outstanding because it combines high performance with simplicity of design and in addition is the lightest-weight automatic transmission now available," Quinn said.

In addition to the new transmission, top acceleration and driving performance are provided by two Fluid-Torque Drive torque converters of different types, one for eight-cylinder models and the other for the sixes. These transmissions, which have proven their rugged dependability over millions of miles of over driving, are used in conjunction with the M-6 controlled-type automatic transmission and the V-8 and six-

cylinder engines and are available on New Yorker, DeLuxe, Windsor and DeLuxe models, respectively.

The new fully-automatic transmission for Crown and Custom Imperial models is being built in a new plant in Indianapolis, Indiana. It is an automatically-shifted planetary gear transmission teamed with a hydraulic torque converter. It does away with the clutch pedal and the driver does not have to lift his foot from the accelerator to shift gears.

It has only 183 major parts, compared with 218 to 295 major parts in competing automatic transmissions. It has far fewer moving parts than other automatic transmissions, one of which has 33 sliding valves in its mechanism. The Chrysler transmission is of so advanced a design that completely automatic clutch-free shifting is done with only nine sliding valves. This transmission weighs up to 214 pounds while other competing transmissions weigh up to a full 100 pounds more. The difference in weight was accomplished through the use of light metal parts in more than dozen major parts.

The shifting arrangement is extremely simple and does not require the driver to look at the gear position indicator at any time. This is due to the "blind-man's" shift designed by Chrysler.

In the normal position there are only two points into which the gears can be shifted by the driver—a push upward puts the transmission in neutral and a push downward puts it in drive.

When the shifting lever is lifted and pushed upward, the transmission is in reverse and when pulled downward the transmission is in low. A luminous dial on the steering column indicates which gear is in use.

WASHINGTON NEWS LETTER

From

WASHINGTON—Three floor victories last week cheered us in our determined fight to maintain important federal services in Florida without imposing unnecessary burdens upon the taxpayers.

Admittedly, it is very difficult to differentiate between worthy, needed projects for which money must be appropriated and those activities or services which are boondoggles and should be eliminated. It is with that in mind that I have been seeking to protect the interest of our state.

In no sense have we gained everything that we wanted, but we have made gains and acquired some backing for the major effort we must make later—to protect the great flood control program. The score at the end of a grueling week stood:

For the airport development program: \$12,500,000 where a bipartisan effort was made to appropriate \$20,000,000.

For weather bureau operations: increase of \$2,300,000 which will keep in operation the Orlando, Fort Myers, and other Florida bureaus threatened with closing.

For virus disease research: \$90,000 where \$125,000 had been sought (House had cut to \$50,000).

These gains are by no means certain and our major effort in the future must be to "sell" this program to the House.

NEWS NOTES OFF THE CUFF—For anybody who needs a good cook book, I'll be glad to send upon request a copy of "Family Fare."

I am due as one of the speakers on the radio hour, "Town Meeting of the Air" on ABC Tuesday evening (June 23).

Bob Glenn, of Sanford, long a leader in the railroad brotherhoods and a widely known church lay leader, is slated for appointment as assistant secretary of labor.

A sudden surge of appropriations measures to the Senate Floor caused most Senators to cancel speaking engagements this weekend and prevented my going to Pensacola for the DAI state convention, but, happily for the convention, I sent in my place Congressman Olin ("Tiger") Teague, the Texas war hero who was wounded many

times in World War II; he is an able speaker, an effective legislator and one of the most popular Members of Congress.

TEACHERS LEAVE FOR HOMES OR VACATIONS

With the ending of the school year several of our teachers said their farewells to Belle Glade. Some are teaching elsewhere in the fall, Miss Nancy McMahon has gone to her home town, Manchester, Tenn., and will be married this summer.

Miss Ruth Ann Doody has left for Canadensis, Penn., and plans to teach on the coast in the fall. Mrs. Inez Dickinson has moved to Duthan, Ala.

John Seagle, Cresco, Pa., has other plans, and Charles Dixon from Lake Worth will teach there in the fall.

Alan and Elizabeth Drake will be at the Pompano Beach High School and Mrs. Betty Blevins will join her husband in Auburn, Ala.

Other teachers vacationing in their home towns are Miss Dot Binkley, Old Hickory, Tenn.; Miss Sara Dizes, Paris, Tenn.; Mrs. Ruth Langworthy, Marshville, Ga.; Miss Kathleen Rogers, Lakeland, Fla.; Mrs. Louise Christ, Crown City, Ohio and Miss Marian Najarian of Port Orange, will spend the summer in Chicago.

Mr. and Mrs. Roy Litchfield are spending part of their vacation in North Harlow, N. C. Mr. and Mrs. Hector Queltette are in Murray, Ky., where

he is attending summer school. Mr. and Mrs. John Abbott are spending some time with their parents in Jasper, Fla. He plans to attend University of Ala.

Mrs. R. L. Murray is vacationing for a month in Palm Beach. Teachers attending the University of Florida for the 8 weeks summer course are Mrs. R. V. Allison, Mrs. Margaret Mosley, Calvin Pascoe, and Mrs. Jean Lloyd, former teacher, who will be on the teaching staff this fall.

Mrs. Genevieve Gove will be one of the directors of the summer recreational program in the city park as well as Mrs. Dorothy Jones, and Herbert Miller of Palatka.

Mrs. Margaret Earwood will attend the Art Institute, Tarpon Springs.

SUMMER PROGRAM OF RECREATION JUNE 22

The summer recreation program will begin Monday with registration at 2:30 p.m., June 22, in the Belle Glade Municipal Park.

The County Board of Public Instruction in cooperation with the City Recreation Program are sponsors. Directors appointed for the special six weeks period are Herbert Miller of Palatka, Mrs. Dorothy Jones and Mrs. Genevieve Gove.

Mr. Miller will have charge of physical activities for boys and Mrs. Jones will direct physical activities for the girls every day except Thursday. On

Thursdays she will conduct a reading club at the Elementary School Library.

Both boys and girls of all ages will be encouraged to check books for recreational reading. She plans to schedule a story hour every Thursday afternoon in connection with the Reading Club.

Mrs. Gove will offer arts and craft each morning in the Girl Scout Hut and will show movies in the city library two afternoons each week at 3 o'clock. She will also assist with the physical activities, working mostly with the younger children of school age.

The directors met Saturday with Mrs. C. W. McDonald Supervisor of City Parks and recreation and discussed plans for the program.

Among the special events that are being scheduled are swimming, a wheel parade, square dance for children and parents, talent night, field day and a pet show. The pet show will be held during the second week on Wednesday at 2 o'clock.

Look for more details of the pet show and other summer recreational news in next week's Herald.

PERMANENT COMMISSIONS AVAILABLE TO FORMER AIR FORCE RESERVES

Former Air Force Reserve officers who declined their permanent commissions earlier this year are now eligible for a new appointment in the Air Force Reserve.

The announcement was made

RATTLESNAKE FOILED

Whip-lash strike of the deadly diamondback rattlesnake, shown above, is thwarted by the new unbreakable trousers of a camper. These pants, lined with light, flexible Mosel wire cloth, provide thigh-high protection against venomous snakes.

recently by Maj. Gen. Charles E. Thomas, Jr., commanding general of 14th Air Force, Robins, AFB, Ga.

Former reserve officers who apply for a new commission must meet Air Force standards for direct appointments, and applications for extended active duty, normally required, will be waived.

The new program will afford a second chance for several thousand reserve officers within the 14th AF area who earlier this year declined to renew their commissions. The 14th AF covers 12 Southern and Southwest-

ern states from North Carolina to New Mexico.

In considering applications, records of reserve officers will be checked to insure they did not decline their previous tender of appointment to avoid overseas or other hazardous duty.

Former reservists who desire to be considered may submit their applications to Commanding General, Headquarters 14th Air Force, Robins AFB, Ga.

The "Devil's Back Bone" is a low-growing succulent plant native to tropical America.

SAFETY WALL

That cannot be matched!

★ The Only Blowout Prevention!

—with exclusive new U. S. Nylon LIFEWALL

★ Double Tire Strength!

—twice the protective power against impact

WITH 20% GREATER MILEAGE

New processes and materials give this great advance in U. S. Royal Air Ride mileage

WITH VASTLY SMARTER APPEARANCE

—new style... new slim, trim whitewalls or blackwalls

WITH THE WORLD'S MOST COMFORTABLE RIDE

—absorbing the road in silence at any speed

This minute of reading may
SAVE A LIFE!

What you see presented on this page is a probably the most sensational value in tire history.

It is a value which unites the superb qualities of U. S. Royal Tires with the positive blowout prevention of the new U. S. Nylon LIFEWALL.

Wedded for Life and Safety

In this new combination, you have the finest air-container ever developed with all the added strength of Nylon to banish blowout possibility!

A Goal of Half a Century Now Fully Realized

What does new LIFEWALL U. S. Royal mean to you is easy to see and understand.

You put LIFEWALL SAFETY between you and all the common blowout risks—as you also double your tire strength—get 40% additional mileage, with the most comfortable of all tire riding.

These gains are by no means certain and our major effort in the future must be to "sell" this program to the House.

NEWS NOTES OFF THE CUFF—For anybody who needs a good cook book, I'll be glad to send upon request a copy of "Family Fare."

First Calf Born in America From Frozen Semen

The first live calf ever known to have been born in America from frozen semen was a "dropped" on the farm of John and Melford Hill of Rt. 1, Janesville, Wisconsin, Friday morning, May 29th, 1953 according to a report released recently by the Wisconsin Scientific Breeding Institute, an American Breeders Service, in Madison, Wisconsin.

E. O. Conrad, Manager of the Institute reported that a number of artificial breeding organizations are experimenting with the use of frozen semen in artificial insemination, but to date, as far as is known, this calf is the first in America that has resulted from the frozen semen process.

Conrad pointed out that the British were the first to conduct experiments in successfully freezing and thawing semen. They have been successful in keeping semen frozen and of good quality, for as long as one

year. A number of calves have been born in England.

The Wisconsin Scientific Breeding Institute, a non-profit organization, in cooperation with the American Foundation For The Study Of Genetics, a publicly-endowed, research center at Madison, reported the experiments of the British scientists and have bred over 2,000 cows with frozen semen, some stored as long as 4 months.

This marvelous discovery can very well make it possible for a single proved bull to have possibly as many as 100,000 offspring through artificial breeding. While now three out of every four cubic centimeters of unfrozen semen is wasted, with frozen semen, every drop could be used. There will be fewer bulls in the stud, but better bulls producing many more offspring. This discovery will make possible a far wider distribution of the influences of great proved sires. It will be possible for the

average farmer almost anywhere in the country to have the mating of his cows to the best breeding bulls in the world at probably no more than the regular charge now being made. Semen banks will be the answer. Commercial breeding organizations will build up banks of semen from their sires during the slack breeding season, thus obtaining the most economical use of the bull. These semen banks will make it possible for dairymen to have service from a bull long after he has died. In natural service it is considered good if a bull has a few hundred offspring. Artificial breeding has boosted that figure into the thousands, and now with frozen semen, it could very well be into the hundreds of thousands.

Although frozen semen in the popular sense may seem a simple process, a tremendous amount of research and study still remains to be done by the researchers at both the Wisconsin Scientific Breeding Institute and the American Foundation For The Study Of Genetics.

Semen to be alive and of good quality must of necessity be frozen carefully through the low temperature range of 40 degree Fahrenheit to -110 degree Fahrenheit (temperature of dry ice) and then held until used. The British scientist discovered that this could only be done by using glycerol as a bulking agent, properly cooled. The active of glycerol in the sperm during the freezing and thawing process.

The Wisconsin Scientific Breeding Institute is managed by the American Breeders Service of Chicago, the world's largest privately owned artificial breeding organization. The six ABS studs will breed over 800,000 cows this year with fewer than 150 proved sires. Rocky County Breeders, of Janesville, Wisconsin one of the 285 organizations using ABS service, co-operated in the experiment, and their inseminator Beryl Grube, artificially bred the cow having the first calf.

SUGARCANE ACREAGE

(Continued from Page 1)

of 500,000 tons and provide a normal carryover inventory. (The 1941 crop was the last crop to which restrictions were applied in the mainland cane area.) Section 302 of the Act specifies that in determining proportionate shares for individual farmers, the Secretary may take into consideration "past production" and "ability to produce." The Secretary is required to protect, insofar as practicable, the interests of new producers and small producers and the interests of producers, who are cash tenants, share tenants, and sharecroppers. In view of the importance of these considerations, the Department desires to obtain the views of interested persons.

To provide a basis for discussion of the hearing, the Department suggests the following method of establishing proportionate shares:

(1) Shares would be established in terms of acres of sugarcane planted for the production of sugar.

(2) A farm base would be established for each farm having a record of acreage for sugar and seed during any year of the highest acreage on the farm during the years 1950, 1951, and 1952. This base would be established by adding (a) 50 percent of the highest acreage on the farm during any one of the years in the base period as the measure of "ability to produce" (b) 25 percent of the sum of the acreage for the farm for the other two years of the base period as the measure of "past production."

(3) Except as provided below, proportionate shares for individual farms would be determined by applying to the respective

farm bases the adjustment factors required to produce the quantity of sugar needed.

(a) The minimum share for any farm with acreage in any of the crop years 1950 through 1952 would be 10 acres.

(b) The share for any farm with a farm base between 10 acres and 25 acres would be the base for 10 acres plus 10 percent of the excess acreage.

(c) The share for any new farm (a farm without a base and without acreage in 1950) would be 10 acres.

(d) Upon request of the producer the share for any farm may be increased up to 70 percent of the 1953 acreage.

(e) Provisions would be made for appeals.

Interested persons are also invited to present their views concerning the quantity of sugar which should be considered by the Secretary as a normal carryover inventory, taking into consideration freeze damage and other contingencies.

Briefs may be presented at the hearing (in original and three copies) or mailed to the Director of Sugar Cane Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C., so as to be received not later than July 8, 1953.

The Department proposes to make a determination in this matter prior to the planting period this fall.

RICER MARKETS FIRM TRADING IS INACTIVE

Rice markets remained firm during the week ended June 18. The Department of Agriculture reported. The new crop continued to make favorable progress in Texas and Louisiana except where damage was caused by the recent floods. Planting continued to progress rapidly in Arkansas. In California, rains weather retarded the development of the new crop. Moderate quantities of milled rice continued to move to contributing centers, mostly representing deliveries against old contracts. The demand for milled rice remained slow with prices generally unchanged.

World rice production in 1953 (August-July) was the largest on record. The total rough rice crop is estimated at 3,544 million cwt., 4 percent larger than the previous postwar high, 3,420 million cwt. in 1948-49, and 5 percent more than the 3,377 million cwt. of 1952-53, according to the third estimate of the Food and Agriculture Organization. The 1948-49 production was about the same size as the largest world harvests of the World War II. Rice acreage was increased whereas this season's weather permitted through the areas of the world in which soils and climate are adaptable to the cultivation of the crop. Moreover, weather in 1952-53 was favorable in many countries, in contrast with the dry years when adverse weather restricted output.

Rough Rice

No sales of southern rough rice were reported during the week. Planting of rice in most of the Louisiana area, with the early seeded fields generally up to good stands except where flood damage occurred. In Arkansas planting progressed rapidly and is expected to be mostly completed this week.

California rough rice markets were inactive during the week with no sales by growers reported in the principal producing areas. Prices of rough rice were nominally unchanged with No. 1 rough rice yielding 48 pounds milled head and 70 pounds total milled rice largely quoted at \$6.75 per 100, bulk country warehouse receipt basis. New crop conditions were less favorable than at this time in recent years due to unseasonably cool, showery weather which continued to retard development. Stands in a number of sections were reported to be good, growing conditions to date and serious plant insect infestation.

California mills processed 929,454 cwt. of rough rice during May compared with 778,071 in April and 653,834 in May 1952. May millings brought totals for the season since October 1 up to 8,501,167 cwt. against 8,546,923 during the same months last season. Stocks of rough rice at mills at the close of May totaled 376,135 cwt., compared with 189,818 cwt. earlier. On the basis of the December crop estimate, supplies of California rough rice remaining June 1 for milling, export, or carryover amounted to 2,505,000 cwt., against 1,616,000 a year earlier and 2,699,000 two years back.

Milled Rice

Milled rice markets continued firm with prices about unchanged. At Houston, No. 2 long grains were quoted at \$14.75-15.25, No. 2 Zenith \$15.75-16.25, long grain second heads \$9.50, third grain second heads \$9.00, screenings \$2.00-2.50, and brewers' \$1.25-1.50.

brought the total arrivals from the United States since August 1 to 3,585,454 cwt.

FLORIDA MANGO FORUM IN MIAMI JULY 8th

Miami's Bayfront Auditorium has been selected for the thirteenth annual Florida Incubator Forum, to be held on Wednesday, July 8th. This, as usual, will feature a large exhibit of introduced and native Florida varieties of the world's most delicious fruit, as well as exhibits of products of the mango and all the supplies and materials needed in its production and marketing. Those persons having fruit to exhibit may contact Mr. Roscoe Glenn, Chairman, Variety Exhibit, Chairman, an exhibit made usually three fruit. There is no fee for exhibiting, but the fruit exhibited becomes the property of the Florida Mango Forum. The annual program will take place in an adjoining room and will include the usual practical and scientific papers given by research workers and growers.

Mr. David Hughes of Miami is General Display Chairman. Exhibits of a commercial character, under the direction of Mr. Raymond Turner, including mango nurseries, gift packages, processed mango products (both in glass and frozen), and many supplies necessary in the growing and marketing of Florida mangoes.

Because mango growers come from all over the State, plans have been made for two separate tours to visit points of mango interest in Dade County. A tour of the Department of Agriculture and the Department of Agriculture will include an opportunity to see some of the extensive new mango grove plantings of the south part of Dade County. The escorted tour will leave the intersection of Tamiami Trail and Highway No. 1 in Miami at one o'clock, Tuesday, July 7th. This is in charge of Mr. J. Frank Williams. The day following the Forum that is, Thursday, July 9th, another tour will leave the same point at nine A. M. and will go to the South Campus of the University of Miami to visit the Food Technology Department and the Department of Horticulture.

The Florida Mango Forum Fellowship dinner, to be held at seven o'clock at the Bayfront Auditorium on Tuesday evening, July 7th, will be an important event for "mango man" to meet one another in an informal atmosphere. Mr. D. F. McConnell, dinner chairman, is in charge of reservations. Attendance at this, as well as at the exhibit and program on the following day, is open to the public as well as to members of the Florida Mango Forum. This year's officers and Executive Committee who guide the affairs of the Forum include: President, Miss Olga M. Kent; Vice-President, Col. Kevin O'Shea; Bradenton; Secretary, John Campbell; Homestead; Treasurer, Frank Smithers, Jr.

Installing Overlap Insulating Siding

This line sketch indicates the general procedure for installing overlap insulating siding so that the pattern and shadow lines are in proper alignment. Starting at the lowest corner of the building, you install a full panel of siding (panels vary in width from 9 to 15 inches and in length from 44 to 48 inches, according to pattern and manufacturer). After the first course is completed along one side of the building, a second course is started, this time only one-third of a panel. The third course starts two-thirds of a panel.

The fourth course starts the cycle again with a full panel. Pieces cut from starting panels should be saved for possible use at the opposite end of the course. Or they can be used around doors, windows and chimneys.

Each panel requires 14 to 16 nails made of either black enameled galvanized iron, or coated with asphalt. Nails should be hammered snugly into panels but never driven deep enough to rupture the asphalt coating on the siding.

Miami Beach; Dr. Roy Harkness, Homestead; John Kaiser, Ft. Lauderdale; Dr. B. F. Hart, Ft. Lauderdale; M. U. Mounts, West Palm Beach; L. H. Zill and Vincent Gallagher, Delray Beach; and W. W. Carmichael, Perrine.

here's only one answer... Chevrolet trucks must be the best buy

Fleet operators, farmers, independent truckers—truck users everywhere buy more Chevrolets than any other make. There can be only one reason for that: Chevrolet trucks offer more of what you want.

As the official registration figures keep rolling in, they keep telling the same positive story about truck popularity and truck value: Again in 1953, for the twelfth straight production year, truck buyers show a clear-cut and decisive preference for Chevrolet trucks.

If you're a truck user, this fact is mighty important to you. Why? Well, as you know, trucks are built and bought for just one reason—to do a job. So isn't it logical then that since Chevrolet trucks outsell all others, they must do a better job at lower cost?

That's why it will pay you to stop in and see before you buy your next truck.

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!

Glades Chevrolet Company

SOUTH BAY BEAN CITY LAKE HARBOR

Mr. and Mrs. John L. Evans and son, John Brown, Mr. and Mrs. Mark Challenor, Mike Jim and Vicki, Mr. and Mrs. Billy Rogers, Laura and Billy, Jr., were weekend vacation guests at the Columbian.

Mr. and Mrs. Clayton Waters had as house guests last week Mrs. G. M. Waters of Goshen, Mr. and Mrs. James Converse and children, Jimmie, Janice and Judy and C. J. Davis of Atlanta, Ga.

Linton Miller returned home Sunday from the Belle Glade Memorial Hospital, where he was treated for a light heart attack.

Lucy Pearl Kelso, daughter of Mr. and Mrs. Y. M. Kelso of South Bay and Billy Jackson, son of Mr. and Mrs. James Jackson of Bean City were presented with the American Legion Auxiliary awards as members of the eighth grade graduating class, according to the announcement of Principal Pelton-Morris.

Clayton Miller and daughters, Florence and Mary Lou, are visiting his sister, Mrs. Verda Higginbotham and brothers, Linton, Oren and Dick Miller and their families.

Billy Bowen, Johnny Willis, David White and Danny Mena left Monday morning with the

Palm Beach County 4-H boys' team, numbering 40 for a week 4-H Camp at Lake Placid.

Mrs. Bob Anderson of Port St. Joe and two daughters visited her niece, Mrs. Carroll Warren, and Mrs. H. B. Walker and their families on Saturday. She had been spending the week with her daughter in West Palm Beach.

Mr. and Mrs. C. I. Chaney and four children, formerly of Arcadia, moved to South Bay from Pahokee last week. He is manager in charge of the community at the South Bay Sugar Plantation.

Pauline Walker was the weekend house guest of her sisters, Miss Maxine and Miss Marlene Walker in Miami.

Mark Challenor started his travels with seasonal labor for Hamilton, N. Y. this week. He and his family will follow shortly to spend the summer in the snap bean summer vegetable area of New York.

R. C. White, Bill Morrison and their house guest, D. E. White of Lineville, Ala., enjoyed a day deep sea fishing off Jupiter Thursday and brought home 300 pounds of fish.

BIBLE SCHOOL OPENS AT SOUTH BAY

The annual South Bay Vacation Bible School opened Monday at the South Bay Baptist Church with a program starting at the City Hall and ending at the church.

The registration on the opening day was 56 children in the 4 to 16 age group, the largest number being among the younger age groups.

Mrs. R. A. Hall of Bean City is Principal of the School and Mrs. W. M. Jeffries secretary. Mr. Fred N. Cato, Mrs. S. E. Warren are in charge of the Beginners; Mrs. E. J. Lesthlean, Mrs. W. M. Jeffries in charge of Primaries; Mrs. Wanda Prevatt and Randa Hall in charge of Juniors; Mrs. Alice Lamoureux in charge of the Intermediates and Miss Wilma Little in charge of the Nursery.

Mrs. H. C. Willis and Mrs. D. L. Shiver form the hospitalty committee to furnish daily refreshments.

The school will be in session for one week, June 15 to 20th, inclusive with classes in Bible Study, handicraft, music and recreation daily from 8:30 to 11:30 o'clock.

SOUTH BAY LIONS TO FURNISH GLASSES

The South Bay Lions made arrangements at their regular supper meeting at the Legion Hall Thursday evening for eye glasses for one of the school children upon recommendation of Principal Pellon Morris.

He was instructed to contact Dr. J. Y. Creech, arrange for an examination and fitting of glasses. Also to contact Principal Jensen for the recommendation of the school.

any recommendations from his school.

Plans were discussed for erection of bleachers and back stop at the ball park. Treasurer Frank Willis announced the receipt of \$158.20 from the Lions wives, proceeds of the Installation dinner at the Belle Glade Municipal Country Club and stated that there would be approximately \$150.00 to apply on the ball park after all bills had been paid.

President Eric Hartline presided. Mrs. Mary Waters and Mrs. Billie Hartline served a fried chicken dinner to members F. B. Willis, W. M. Jeffries, S. J. Fisher, F. W. Kelley, Pellon Morris, T. L. Driggers, Eric Hartline, Clayton Waters, R. C. White and Melvin Herring and their guests of the evening.

Summer Recreation Program To Open On June 22

The Palm Beach County Summer Recreation Program for South Bay and Lake Harbor, sponsored by the Palm Beach County Board of Public Instruction and the local Parent-Teacher Association will officially open on June 22 and close on July 31.

Children of school age, 6 to 16, of the community are invited to enroll and enjoy the program. Advance registration at South Bay is 70 children.

Principal Pellon Morris will be in charge of the program both at South Bay and Lake Harbor. Regular supervised recreation will be conducted at the Lake Harbor School each morning from 8:00 to 12:00 o'clock and at South Bay from 1:15 to 5:15 o'clock.

A different theme has been assigned for each week. The first week will be registration week; the second will be patriotic week; the third, nature week; the fourth, wheel week; the fifth, tournament week and the sixth and last will be exhibition week.

This program is an annual summer program put on as a vacation project for recreation and improvement of the school children and includes, indoor and outdoor games, competitive games, handicraft work, swimming, character building, teaching of good sportsmanship and patriotism.

The supervisors are furnished by the County Board of Public Instruction and salaries paid out of regular school funds. The Parent Teacher Association and community are expected to furnish needed supplies and equipment for the program.

CORRECTION

By error last week it was reported that Julius Herring had been ordained deacon in the

Church of Latter Day Saints. It was instead his grandson, Michael Herring, son of Mr. and Mrs. Melvin Herring, who was recently ordained deacon. Elder Julius Herring, who is a leader in the Everglades Church of Latter Day Saints, is now a member of the High Council.

Approximately 86 species of orchids are found growing wild in Florida.

LOCAL 4-H GIRLS FINISH COURSE

About 500 4-H Club girls finished a week of learning about homemaking at the Annual short course at Florida State University.

Friday night session of officers was held followed by a candlelight dedication ceremony. Ann Rykard, Madison, Fla., was elected president of the Florida State Girls 4-H Club council. Three Belle Glade girls attended in the dress review.

Winifred Barry led the assembly each morning in the pledge of allegiance to the flag. Cherry Corbin reviewed the certificate for the Belle Glade girls and Jeannette Waddell participated in the dress review.

The girls learned to bake, can blackberries, sew and fit clothing, use dry milk to make fruit whip, and to make muffins with a dash of sweet potato.

The girls had a lot of fun, they went to Lake Bradford, where the University owns a camp, had a watermelon cutting, dress review and celebrated the founding of 4-H club

foreunner, the Tomato Club, fifty years ago.

This was the 38th year of the

short course and has been described as one of the finest so far.

DEARBORN REAR-ATTACHED MOWER

Can be attached to the Ford Tractor in a matter of minutes, detaches even faster. You can switch to cultivating or any other job, and back again to mowing in a hurry. Can cut up to 30 acres a day, makes sharp, clean turns, backs into corners.

Improved, lightweight drive reduces vibration to a minimum for smoother performance, longer life. Cutter bar is lifted and lowered by Ford Tractor Hydraulic Touch Control. An automatic release permits cutter bar to swing to rear when it hits an obstruction.

Cutter bar can be tilted to four positions. Tapered roller bearings in Pinner Drive. 6 ft. or 7 ft. cutter bar. If you want a real mower, this is a Dearborn. Ask for a Dearborn Attached Mower before you buy!

New CASE

Field Forage Harvester

Here's a sturdy machine which provides a real short-cut in the making of corn or sorghum silage. In one power operation, the Case field forage harvester cuts the standing row crop, chops it into short, uniform lengths, and loads the chopped material into truck or wagon driven alongside or trailed behind. Also may be equipped with pick-up mechanism for windrowed hay crops, green or dry. See us about it.

Plenty of HUSTLE from the instant you START

(Have you tried T.T. Dynaflow?)

THE automobile pictured here is a 1953 Buick Special with Twin-Turbine Dynaflow. And it's a sizzler in supple stance.

You discover that truth when you take its wheel—when you try it for getaway—when you head it up tall hills—when you guide it by a truck on a safe-passing stretch.

The instant you want to move, you move. You can swoop from standstill to a legal 30 mph quicker than quick. Fact is, this spectacular new TT Dynaflow gives you swift getaway, plus silence, plus smoothness, in a

combination no other automotive transmission in the world can equal.

The instant you want a lightning burst for passing, it's there—velvet forth from a Fireball 8 Engine with the highest horsepower and compression ratio ever to power a Buick SPECIAL.

The truth is, the instant you feel this big, broad, thrill-charged beauty in motion, you'll know it for a performance automobile—nimble and eager, responsive as quicksilver.

But exhilarating action is just part of the story here.

There's spacious roominess. There's a magnificent ride. There's superb handling ease. And to cap it all, this Buick delivers for little more than the "low-priced" cars.

Why not drop in on us this week? We'll be mighty proud to have you try the greatest Buick SPECIAL yet built.

*Standard on Roadmaster, optional at extra cost on other Series.
